ACTIVEBLITZ

ULTRA CONCENTRATED CLEANER FOR TILE, GROUT, METALS, CONCRETES, AND OTHER HARD SURFACES

ActiveEco ActiveBlitz is a super-strength tile, grout and hard surface cleaner for blasting through tough soil and carbon build-ups on tile, grout, concrete, floors and walls. It is a skillfully formulated powerpack which bursts through the toughest of hard surface grime in industrial deep cleans and restoration work. The product is also used as an oven, grill, canopy, and rangehood cleaner in food preparation areas.

Benefits

- Radical Cleaning Strength – High caustic content provides power cleaning of ceramic tiles and grout, terracotta, concrete, and other resilient surfaces.
- Penetration – High-tech surfactant system, and specially penetrating agents combined with the powerful alkali blend, provides top cleaning performance on a wide spectrum of soil types.
- Grease & Oils – **ActiveEco ActiveBlitz** with special distinction on oily and greasy soils, carbon build-ups, and automotive soiling.
- Low Odour Formula – makes it pleasant and easy to use
- Food Friendly – Ideal for use in food preparation areas, food factories, and bakeries.
- Ultra-Concentrate – Highly concentrated – highly economical dilution ratios.

Where to Use

Ideally suited for use on all resilient flooring including concrete floors, ceramic tiles, terracotta, and grout lines. Excellent in applications such as industrial kitchens, refuse compactor areas, workshop floors, food processing facilities, bakeries, and public eating areas. Also used for cleaning rangehoods, canopies, ovens and grills.

Substrates

Do not use or allow **ActiveEco ActiveBlitz** to contact painted surfaces, non-ferrous metal surfaces (especially aluminium) and polymer coated flooring. Not suitable for wooden surfaces.

Safe on all man-made tiles, natural stone products, grout and concrete at recommended dilutions.

How to Use

ActiveEco ActiveBlitz is corrosive and appropriate care should be exercised including the use of suitable protective gloves, goggles and protective clothing and warning signage.

Read and understand the MSDS before use
Always pre-test in an inconspicuous location for sensitivity to chemicals. Avoid contact with food.

Directions

1. **Deep clean applications:** Mix 1 part **ActiveEco ActiveBlitz** with 20 to 60 parts water (50 to 15ml/Litre). **Standard cleaning applications:** Mix 1 part ActiveEco ActiveBlitz with 80 to 120 parts water (12 to 8ml/Litre).
2. Apply solution with a mop and bucket, sponge, auto-scrubber or pressure washer.
3. Agitate heavily soiled areas using a stiff brush, autoscrubber or slow speed rotary scrubber.
4. Allow 10 minutes dwell time and re-agitate
5. Rinse thoroughly with clean water.

Classified as hazardous according to the criteria of Worksafe Australia.
Classified as Class 8, according to the Australian Dangerous Goods code for transport.
Observe all safety recommendations made on the MSDS and product label.
