

Cleaning Oil Contaminated Wildlife

Product Application Sheet - Triple7 BioConcentrate

Triple7 BioConcentrate is a bio-based oil contamination clean-up chemical which enables easy and safe fuel and oil spill clean-up. It is listed on the AMSA National Oil Spill Control Agent (OSCA) Register as a Surface Cleaning Agent (SCA) and an Oil Herding Agent (OHA) and meets the requirements for shoreline and marine eco-toxicology testing. Its use is widely accepted as a gold standard in ocean oil spill cleanup and in coastal clean-up applications world-wide.

Accreditations:

> AMSA
(Australian Maritime Safety Authority)

> OSCA National Plan
(Oil Spill Control Agents)

> MEMAC
(Marine Emergency Mutual Aid Centre)

> ROPME
(Regional Organisation for the Protection of the Marine Environment)

Directions for use:

If waterfowl are completely matted in oil sludge:

1. Wipe the excess oil off using absorbent paper or cotton towels.
2. Partially submerge the bird in a 5% bath of Triple7 Bio Concentrate at 27 degrees Celsius.
3. Wash to remove oil. Repeated washing for 20 minutes will release most oils.
4. Rinse the bird in fresh potable water after cleaning
5. The solution may need filtering to keep it clean.

For Reptile amphibians:

1. Avoid inhalation of oils and cleaning solutions into breathing passages, eye tissues and mouth.
2. Spray a 5% solution onto the animal, wipe clean and rinse off.
3. For cleaning around mouth and inhalation openings, eyes, anal openings, sex organs and ears, it is recommended to mix 1 part Triple7 Bio Concentrate with 9 parts hydrogen peroxide (2% active), then dilute this at 1:1000 with water.

Triple7 BioConcentrate is a plant based product derived from seed and vegetable fatty alcohols and is non-toxic, readily bio-degradable and does not contain; glycol ethers (such as butyl cellulose), terpenes (such as, citrus solvents), caustics or metasilicates, synthetics, petroleum distillates, aromatics, builders or reagents. It does not bio accumulate or upset the balance of ecosystems, which makes it safe for marine animals and plant life. There are no known legal or application restrictions for use of this product in a water environment.
