

FILTER KIT

DESIGNED TO REDUCE WASTE DISPOSAL COSTS

Your alternative to dangerous & explosive cleaning solvents!

The Purasolve Filter Kit is especially designed to reduce waste disposal costs and enable easier maintenance in parts washing/weapons cleaning applications.

- Integral recycling/reuse system
- Cuts waste disposal costs
- Extends solvent life
- Eliminates typical chemical change-over
- Multi-stage filtration down to 0.1 micron
- Ambient Temperature Operation
- Replaceable Filters

FILTER KIT

DESIGNED TO REDUCE WASTE DISPOSAL COSTS

Micro Filtration Process

The equipment consists of a sophisticated micro filtration process that filters down to 0.1 micron and effectively removes oils and greases that are washed off the parts/weapons and that are dissolved in the cleaning solution. Solvent life extension becomes easy, effective and predictable.

The Purasolve Filtration System has a multi-stage filtration and replacement filters are available.

Benefits

- Eliminates typical 4-6 week chemical change-over
- Extends life of Purasolve Safety Solvent up to 18 months
- Reduces amount of toxic waste
- Reduces waste disposal cost
- Enhances workplace safety by replacing hazardous solvents and cleaning solutions
- Eliminates outside rental service costs

Significant Savings

When used in conjunction with Purasolve Parts Cleaning/Weapons Cleaning systems and Purasolve Safety Solvents, this results in significant savings in through-life costs, along with protecting the health of the user.

Reduced time and costs

The enhanced cleaning properties of Purasolve Parts Cleaner, together with the exceptional filtering and multiple user-accommodating properties of the dip tank holding the solvent, have reduced the time it takes to clean a component or weapon by over 50% (equating to a real-time saving of over two hours per weapon).

There is a huge reduction per year per station in wastes disposed of or sent off-site for recycling. A payback period of less than 2 years is normal, whilst also improving worker safety through the removal of hazardous solvents and cleaning solutions.

Part No #	Description	Size
PSFK	Purasolve Filter Kit	Dimensions: 475mm x 365mm x 127mm Weight: 2kgs
PSPF	Purasolve Primary Filter	
PSSF	Purasolve Secondary Filter
