

# PS-80

## AGITATING PARTS WASHER FOR HANDS-FREE OPERATION

### Your alternative to dangerous & explosive cleaning solvents!

The Purasolve PS-80 is a heavy duty agitating Parts Washer Cleaning System that increases safety and reduces through-life costs through a unique recycling system.

- Integral recycling/reuse system
- Utilises powerful safety solvents
- Reduces disposal issues
- Protects your health
- Reduces through-life costs

### Ultimate automatic agitating parts washer

The PS-80 is the ultimate automatic agitating parts washer. It is designed for high volume use and requires less solvent for operation than traditional parts washers and makes acquisition cost-effective.

The equipment utilises a sophisticated micro filtration process that filters down to 0.1 micron and effectively removes oils and greases that are washed off the parts and that are dissolved in the cleaning solution.

Significant solvent life extension becomes easy, effective and predictable.

The Purasolve range of safety solvents are especially designed to eliminate the need for outside rental service and to reduce the ongoing costs of solvent disposal and replenishment caused by waste generation. When used in conjunction with Purasolve Parts Cleaning Systems, this results in significant savings in through-life costs, along with protecting the health of the user.

# PS-80

## AGITATING PARTS WASHER FOR HANDS-FREE OPERATION

### Benefits

- **Easier Maintenance** - User friendly solvent and parts platform.
- **Saves time** - Air & electrically operated agitating system.
- **Protects your health** - Reduces toxic offgassing and risks from using dangerous solvents.
- **Reduces disposal costs** - Safety solvent \ filtered and re-used for up to 2 years.
- **Reduces through-life costs** - Less toxic waste generated.
- **Lifetime Guarantee** - Unit has a lifetime warranty, provided that only Purasolve filters and solvents are used in the machine.

### Specifications

Overall Height: 1700mm  
Overall Width: 1020mm  
Overall Length: 1480  
Inside Tank Length: 1120mm  
Inside Tank Width: 675mm  
Inside Tank Depth: 725mm  
Shipping Weight: 300kgs  
Solvent Capacity: 300ltrs

### Features

- Hands-free auto lid pneumatically opens and closes for easy load and unload
- “V” notched heavy duty steel roller guides with sealed bearings for smooth, trouble-free operation
- Adjustable flow auxiliary pump with flow-through parts brush for thorough final cleaning
- Large, 300 litre solvent capacity
- 110kg load capacity
- Air and electrically operated
- Comes complete with Envirofluid’s Micro Filtration System for prolonged solvent life
- Variable speed agitation platform
- Cylinder cover protects user from moving parts and pinch points.
