

PARTS CLEANER

RECYCLABLE DEGREASING PARTS WASHING SOLUTION

Purasolve Parts Cleaner is a benzene free, fully recyclable parts cleaning safety solvent that gives users the benefits of a solvent without the health, safety and environmental risks normally associated with solvents. A low hazard, non-dangerous and high flash safety solvent, **Purasolve Parts Cleaner** is designed to help organisations to reduce the need for costly compliance requirements to regulations regarding emissions, disposal and work health and safety.

Extended Life

When used with the **Purasolve Filtration System**, **Purasolve Parts Cleaner** has a significantly extended usable life and can be disposed of with waste oil once spent. The filtration system filters the safety solvent to 0.1 micron giving a constant flow of pure, clean solvent, leaving a residue free surface.

- **Powerful** - cleaner surfaces without toxic chemicals
- **Fully recyclable** - with integral filtration system
- **Safer work practices** - no toxic, hazardous chemical use & handling
- **Cost savings** - reduce toxic waste disposal & VOC emissions
- **Protects the environment** - no ozone depleting chemicals

Benefits

- Eliminate the risk of handling and use of explosive and toxic chemicals
- Reduced hazardous waste disposal costs significantly through recycling and re-using product for up to 18 months
- Improved user safety and comfort with low odour and high flash point
- Reduce your environmental footprint through reduction of hazardous waste disposal and VOC emissions
- Reduce cost of product wasted through high evaporation

Testimonial

“The maintenance personnel were immediately impressed by the effectiveness and lack of odour of the **Purasolve Parts Cleaner**.”

Aerospace Maintenance Facility

“This material exhibits good cleaning properties and can be used for years rather than weeks or months, as with traditional parts washers.”

Airline Repair Workshop
