

POWERFILL

AUTOMATED FILLING STATION FOR EVERSAFE ATOMISERS

Automatic Filling

The Purasolve Power-Fill Station can be used to automatically fill Purasolve EverSafe dispensers without the need to disassemble the sprayer.

The Power-Fill station delivers a standardised amount of chemical to the sprayer with each refill along with the required amount of compressed air.

Work Safety Benefits

Purasolve Power-Fill provides a variety of work safety benefits:

- Replace hazardous aerosols and save on chemical costs by purchasing bulk product, but still have the convenience of an atomiser.
- Use compressed air to pressurise the chemical/lubricant into an atomised spray, instead of flammable and/or dangerous propellants.
- Spray 100% chemical, rather than a mix of harmful propellants, ensuring improved health, safety and environmental outcomes for workers and organisations alike.
- Fitted with special chemical resistant seals to handle almost any product.

Features

- Works exclusively with Purasolve EverSafe Atomisers.
- Level control fills and pressurises in seconds without removing the filler cap.
- Top fill port eliminates leaking seals.
- Great for cleaners, degreasers, penetrating oils, brake cleaners, solvents, etc.
