

## Triple7 Suppress

### Bio-Based Odour Neutraliser

**Triple7 Suppress** is a unique readily biodegradable, non-toxic and non-corrosive plant-based formulation especially developed for destroying odours. It attaches to light aromatics, gases and attached flavonoids or constituent odour-causing substances. The product has an oxidising effect and works to convert Hydrogen Sulphide to harmless peroxide compounds, helping to prevent smells.

#### Physical Properties (typical chemical data – actual may vary)

<b>Colour:</b>	Amber Liquid	<b>Odour:</b>	Mild Ozone Odour
<b>pH:</b>	9.0 (Concentrate)	<b>Specific Gravity:</b>	1.008 (water=1)
<b>Vapour Pressure:</b>	0.06psi @ 20 degC	<b>Evaporation Rate:</b>	1 (water=1)
<b>Boiling Point:</b>	100 degC	<b>Flash Point:</b>	Not flammable
<b>Safety:</b>	Non-Hazardous	<b>Soluble with water:</b>	Yes – Miscible

#### BENEFITS

**Smart Odour Neutralising Power** – Triple7 Suppress attacks the odour at the source, removing the smell – it does not have a masking fragrance.

**Environmental & Biodegradable** – Triple7 Suppress is formulated from renewable resources is 100% readily biodegradable.

**Conveniently Versatile** – Designed to tackle tough odours and retard Hydrogen Sulphide, while remaining safe to use on most elastomeric, metal & plastic surfaces.

**Safety First** – Triple7 Suppress has no HazChem rating and is a people, plant and environmentally safe chemical alternative. It is free of ferric salts, caustics, petroleum, phosphates, glycol ethers, ammonium compounds, terpenes, magnesium chloride or typical chemical derivatives, enabling odour-related problems to be solved without hazardous additives.

#### HOW TO USE

Always pre-test the solution on the surface to be cleaned to check for any substrate sensitivity to chemicals.

**Triple7 Suppress** can be applied via a hand sprayer, fogger, misting system or in a secure open container.

**Laundry** - Add 30ml to a load of laundry for total odour elimination.

**Hard Surfaces, Carpets and Upholstery** - Spray Triple7 Suppress directly onto the odour source until the surface is lightly damp, avoiding saturation. Repeat when dry if necessary.

**Effluent** - Dilution rates are application specific, ranging from 1:10,000 for effluent treatment to full strength for collection well maintenance. Contact your supplier for specific dilutions and application data sheets.

**Paint & Solvent Odours**- Place product in a secure open container in a safe position in the problem area.

**Hydrogen Sulphide**- Triple 7 Suppress can be spray applied to effluent tanks for odour destruction.

Contact your supplier for additional usage details.

#### SAFETY

- Not classified as dangerous according to the Australian Dangerous Goods code for transport.
- Non-Hazardous according to the criteria of NOHSC or Safe Work Australia.
- Observe all safety recommendations made on the product label and MSDS.
